an understanding which would help all of us. I have nothing against that at all. But in the absence of such an understanding, Auroville cannot be allowed to go to sea and v\e will have to 'ake the responsibility of managing it and, therefore, I think I would unhesitatingly ask the support of the House for continuing the management of the Government for another two

I may touch upon one more aspect in passing and that is the hon. Member said that law and order s'tuation has improved considerably, since the Government look over. This is a fact and those of us who have been aware of what has happened in Auroville will rightly accept this fact. I don't go further into this. On a personal note may 1 end my speech by saying that I have been associated right a. the beginning with this Auroville project. 1 he idea attracted me and t was involved in it; I was aware of some of the things thai happened inside and, therefore, I said in the beginning that I would not take advantage either of the personal knowledge nor would 1 later use this information to say anything against anybody. I wish that people there would get together; I wish wc could find a way which would be in keeping with the spirit of harmony which Shri Aurobin«lo tried to generate not only in this country but throughout the world. I wish that people could rise abov;' thcil narrow limitations and try to become parlies to the vision which Shri Aurobindo gave us. But till such things happen, administratively, it is necessary to see that the affairs of Auroville are managed in an orderly fashion and, therefore Government has really no choice in the matter but to keep the management in its hands. With these words, Madam, I thank hon. Members once again who have spoken on this debate.
